

Delta Head Start Q&As from site visits:

I was asked what models of Fortinet equipment we have at other locations. We currently have a FortiGate 80F, FortiSwitch 124F, and FortiAP 231F at Purcell Early Learning Center, Duncan Irving, and Lindsay Admin.

I also had to make a note that we do not actually need 10 cable drops at Pauls Valley Diffe Lane. I didn't realize that the contractor had already installed cat 5e cabling from the office to each of the classrooms. We still need the one cable drop that will be going to the Wireless AP.
